UK Independent Manufacturer of
Mobile CCTV Tower Solutions

ABOUT

V-CEPTOR

UK Independent Manufacturer of
Mobile CCTV Tower Solutions

V-Ceptor Ltd are a specialist manufacturer of mobile rapid deployment CCTV Towers, based in North-West England, fully independent and supplying directly to the security trade for over 15 years.

With a greater requirement for a robust and reliable mobile solution, all V-Ceptor CCTV towers are engineered and built to the highest quality, utilising the very latest technology. Suitable for uneven ground types and off-grid applications too, our versatile range of CCTV towers are available on solar, mains or hybrid, so we're confident that you won't find a better solution.

- **Established in 2007 with 15-years+ of experience in tower build and design**
- **Solar tower specialists**
- **CCTV Tower range includes:
6m towable V-Solar,
3m fixed V-Mini and
1.4m V-Guard pods.**

V-SOLAR TOWER SPECIFICATION:

- 6m tower height when deployed
- Fully towable – mast height reduces to 3.25m for transportation
- Dimensions of tower 1350mm square, add 2m square for solar panel frame and panels (standard double panel set up)
- Base available in any BS RAL colour
- Tower livery/decals/logo/graphics/chevrons (optional)

PRODUCTS

V-MINI/ V-MINI SOLAR

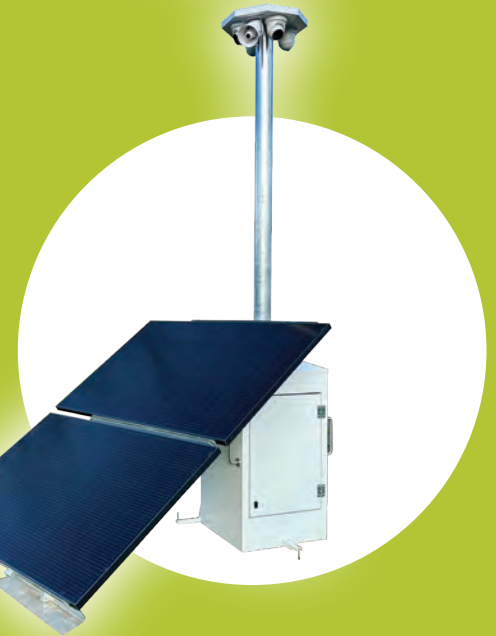

Compact by design

The unique V-Mini/ V-Mini Solar is a user-friendly and compact rapid deployable CCTV tower. Versatile and lightweight enough to fit in any space (indoors or outdoors), the V-Mini Tower is easily manoeuvred into position and designed to be deployed on-site within 15-20 minutes. A great standalone solution, or a fantastic addition to your V-Ceptor fleet.

V-MINI TOWER SPECIFICATION:

- Compact by design - collapsible galvanised mast (reduces for transportation)
- Powder Coat finish in RAL9003 white (semi-gloss) as standard
- Available in two different mast heights - 2.2m or 3.2m
- Bespoke builds available

V-GUARD

PRODUCTS

All round protection

The new V-Guard, with Ajax or AX Pro, by V-Ceptor offers an inexpensive solution to site security. Deployable by one person, the V-Guard is a reliable and low-cost option for a wide range of security applications. Powered by solar and complimented by a battery back-up system, the wireless V-Guard is designed with speed in mind and can be deployed rapidly, easily manoeuvred into position, then left to do its job. The V-Guard can be used independently, or a brilliant addition to your V-Ceptor fleet.

V-GUARD SPECIFICATION:

- Compact by design – splits into two sections for ease of transport
- Weather-proof hard bodied design
- Compatible with Alarm Receiving Centres
- Bespoke livery/wrap optional
- Manufactured in the UK
- Built-in solar panels
- Approx. 1440mm(H) x 680mm (W)

V-CEPTOR WINTER KITS

Say goodbye to battery swap-outs*

Developed and thoroughly tested through winters from 2022 onwards, our additional solar charging Winter Kits are now available. Designed to maximise solar consumption and help maintain battery levels on the shortest of days, the new Winter Kits can help boost your tower solar performance throughout the darker winter months.

Available for V-Solar 6m or V-Mini Solar 2.3m or 3.4m.

V-CEPTOR WINTER KITS SPECIFICATION:

- **V-Solar 6m:** Consists of additional bracket set and 2 x additional 400w* solar panels
- Fully integrated into the V-Solar portal, the Winter Kit can be fit retrospectively to any of your existing V-Solar towers
- **V-Mini Solar 2.2m/3.2m:** Consists of additional bracket set and 2 x additional panels (panel sizes vary dependent on original specification). Can also be fit retrospectively to any of your existing V-Mini solar towers

*Solar performance can still vary due to adverse weather/tower location

*V-Solar Tower can be remotely programmed to switch load off in the daytime during winter months, to increase battery charging & performance.

TRADE RENTAL

Due to expansion and demand we now have a fleet of trade rental towers available to hire.

Towers are normally offered on a minimum 12-week hire term.

We have both V-Ceptor 6-meter solar towers and V-mini solar and 3.2m towers, subject to availability.

We also offer delivery to site along with tower deployment + set up and test/commissioning through to an approved CAT 2 RVRC.
